

Experience the Essence of Pleasance

Before Lutron

What is pleasance?

Pleasance is a fundamental feeling that is hard to define but that people desire to experience.*

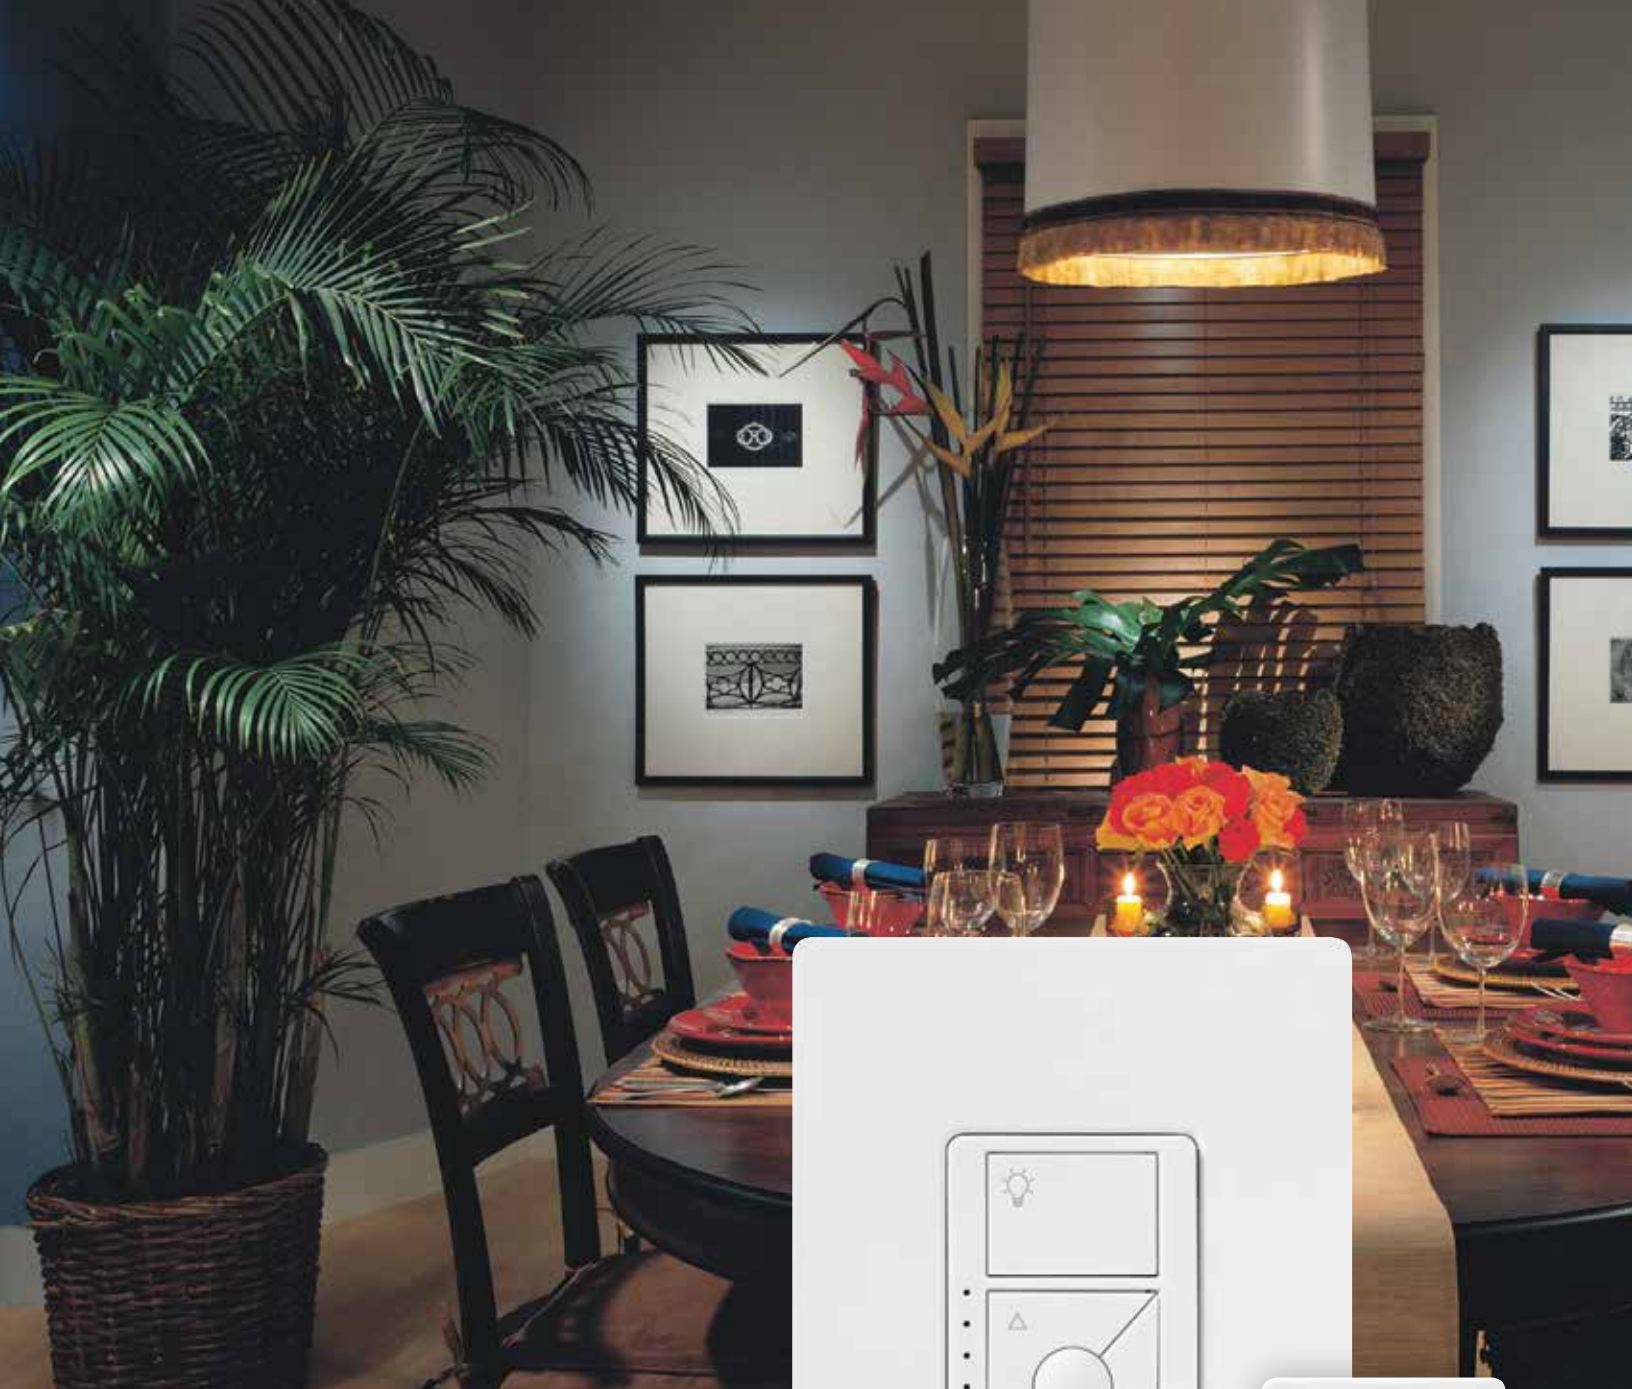

Your home is more than walls and a roof, more than simply a functional space. Your home is a place where you experience **comfort**, **romance**, and **peace of mind**—a place where you experience pleasance.

We believe the right light is a critical building block for pleasance, and the first step for enriching every moment within your home.

Let us show you how our solutions—which are easy to add to a **new** or **existing** home—can help you add pleasance.

Creating just
the right light

Caséta Wireless in-wall dimmer ELV+ shown in White (actual size)
Pico wireless control shown in White (actual size)

Create pleasure with a simple dimmer.

With a switch you can only turn lights on and off, so you're limited to bright light or no light at all.

If you replace a switch with a dimmer, such as a Caséta Wireless dimmer, you can adjust a room's light level to create a totally new atmosphere.

Add a little romance

With a Lutron dimmer, you can lower lights in your dining room for a romantic dinner, or brighten them for family meals.

Select Lutron dimmers to work with:

Dimmable LED bulbs

Magnetic low voltage bulbs

Halogen/Incandescent bulbs

ELV bulbs

Sophisticated daylight control

Battery-powered shades, Pico wireless control
in White (actual size)

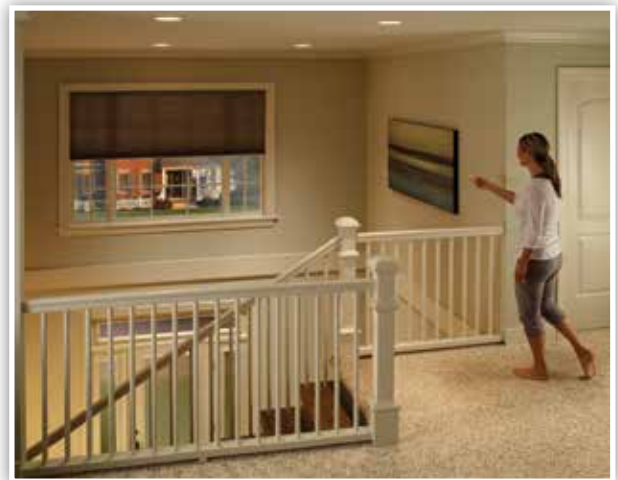

Create pleasure by controlling your window treatments at the touch of a button.

You probably think of shades as a design element. Add automation to them, though, and they become much more functional.

With the press of a button, you can lower shades so they block glare, creating a more comfortable room.

And if you install automated shades in hard-to-reach windows, such as a foyer, you can easily adjust them from anywhere.

Other styles available

As you can see in the photo above, our shades align perfectly. We offer horizontal sheer blinds, wood blinds, Roman and drapery track systems, Kirbé vertical drapery systems, roller shades, honeycomb shades, and tensioned shades. See page 24 for details.

Coordinated control

Pico wireless light and shade controls shown in White (actual size)

Combine light and shade control to take pleasure to the next level.

Having coordinated control provides greater flexibility in a room than having individual control, letting you fine-tune the mood you want to create.

With Pico wireless controls, you can control multiple lights (including table and floor lamps) with one button press and multiple shades with another button press.

When you're in your home theater, you can dim the lights and lower the shades to watch the big game—all from the comfort of your couch.

Control from anywhere

Adjusting lights and shades from a smartphone—or even your wrist—has never been easier, more reliable, or more affordable. And with the new geofencing feature, you won't have to lift a finger. Lights will automatically turn on/off once you're within a set distance of your home.

Apple Watch featuring the Lutron App

Expand **pleasance** from a single room to a whole home

Pleasance goes beyond basic light control. To fully experience the essence of pleasance, let's explore how a Lutron RadioRA 2 or HomeWorks QS system can redefine the way you live.

12 Control from anywhere

Take advantage of easy, convenient control from a keypad or your mobile device.

14 Added integration

Integrate your Lutron system with your home control for added functionality.

16 The right temperature

Ensure you're never too hot or too cold with temperature control.

18 Tying in other connected home products

Enhance comfort, convenience, and security in your home.

20 Customization

Take your home to the next level with advanced integration that matches your lifestyle.

22 Control styles and colors

Complement the look and feel of any room.

24 Shade styles and fabrics

Select from a variety of styles and fabrics.

26 Ivalo light fixtures

Add sophisticated, high-efficiency fixtures.

Control from
anywhere

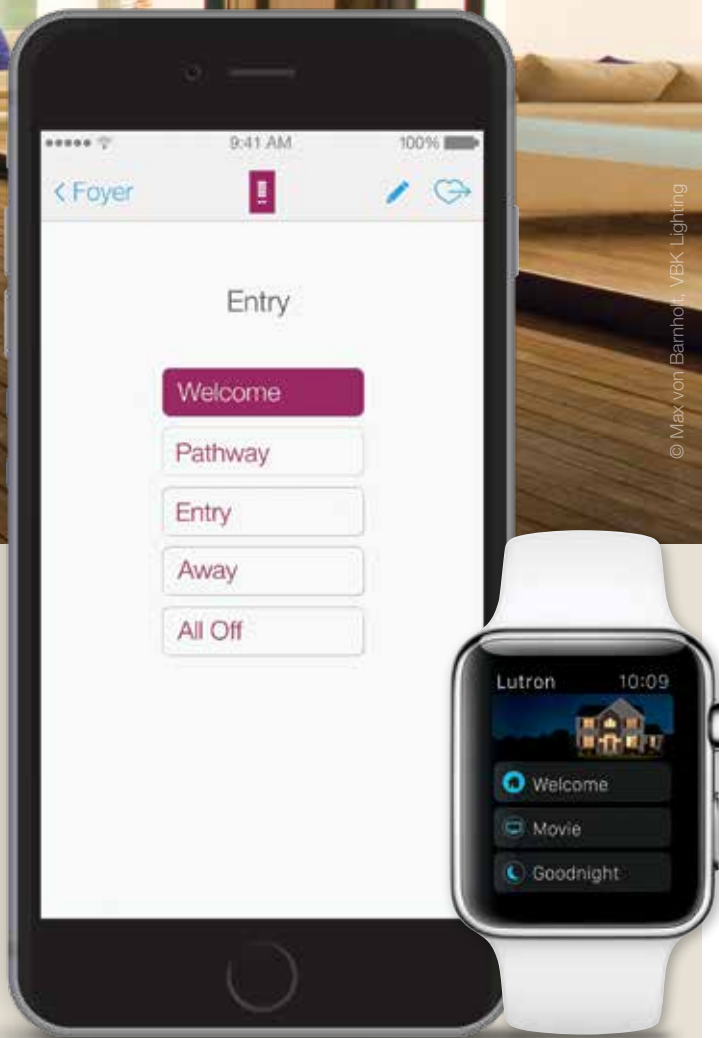

seeTouch keypad* in Mocha Stone
(actual size)

Pleasance is also having control no matter where you are, home or away.

RadioRA 2 and HomeWorks QS systems provide control of lights, shades, ceiling fans, and temperature from wall or tabletop keypads, your mobile device, or from your Apple Watch.

The main benefit of a keypad is that you can create customized “scenes” — predetermined settings for lights, shades, and temperature¹ — that align with the way you use a particular space.

With system control from your mobile device (via the Lutron Connect app) you can adjust lights, shades, and temperature from anywhere in the world. You can also easily edit scenes, as well as create timeclock events, directly in the app.

Smartphone and Apple Watch featuring the Lutron Connect app

¹ Please see page 17 for more information on temperature control.

Apple Watch is a trademark of Apple, Inc.

Added integration

seeTouch tabletop keypad in Midnight
(actual size)

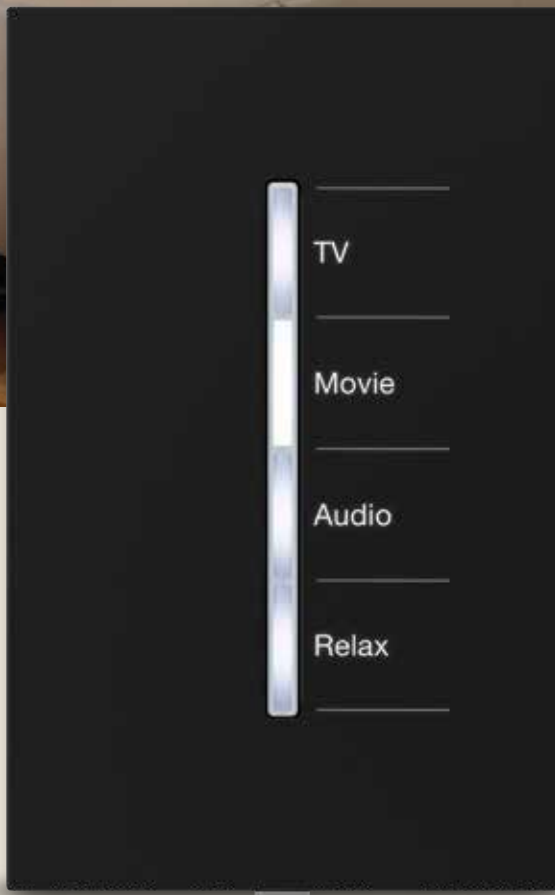

Expand the benefits of pleasance with user-friendly, tech-smart integration.

Integrating a RadioRA 2 or HomeWorks QS system with your home's technology provides user-friendly, advanced control.

For example, integration with your A/V system means one button press will soften lights, lower shades and the projector, and start the movie.

You can also easily check the status of your lights, shades, and temperature when you're away from your home with your smart device.

The right
temperature

TouchPRO Wireless thermostat

Add temperature control for increased comfort and enhanced pleasure.

We offer two types of temperature control that work with both RadioRA 2 and HomeWorks QS systems.

Classic design

Our all-in-one solution looks like a conventional thermostat and is a simple, cost-effective way to add Lutron control to your temperature system.

Unique design

Our 3-part thermostat provides precise temperature control from room to room. This solution has a wall control with a clean aesthetic and a hidden HVAC controller.

- **seeTemp wall control**

You can mount the wall control in places that wouldn't normally be appropriate for a thermostat, such as a sunny space.

You can also install up to 10 controls throughout your house for convenient control from any room, such as your bedroom.

- **Wireless temperature sensor**

You can install up to four wireless temperature sensors in rooms where you want to measure the temperature.

The sensors average the temperature and communicate to the HVAC system to adjust heating or cooling.

- **Third-party HVAC integration**

Available for select brands, such as the Nest Learning thermostat and select Honeywell Wi-Fi thermostats.

Tying in other connected home products

Amazon Echo

Sonos Play:1 wireless
speaker and Pico remote
for audio

Pleasance gives you the ability to connect with your home on a whole new level.

Increase the functionality of your system by incorporating other leading brands for added convenience, comfort, and peace of mind.

Voice Control

RadioRA 2 and HomeWorks QS systems work with Amazon Alexa, so you don't have to lift a finger to adjust your system. Just tell Alexa to do it for you.

Audio Control

Create just the right mood by adjusting sound, along with the lights, shades, and temperature. Lutron works with any Sonos Home Sound System, so you can play, pause, forward, or skip tracks directly from Pico remotes, Lutron keypads, or the mobile app.

You can even incorporate sound into your favorite scenes to tie lights, shades, temperature, and sound together with one button press.

Security

You can also integrate your Lutron system with a security system from a leading company, such as Alarm.com, ELK, or Honeywell. Doing so gives you the added enhancements of lighting and shade control. If an alarm is triggered, interior lights will turn on, exterior lights will flash, and your shades will raise.

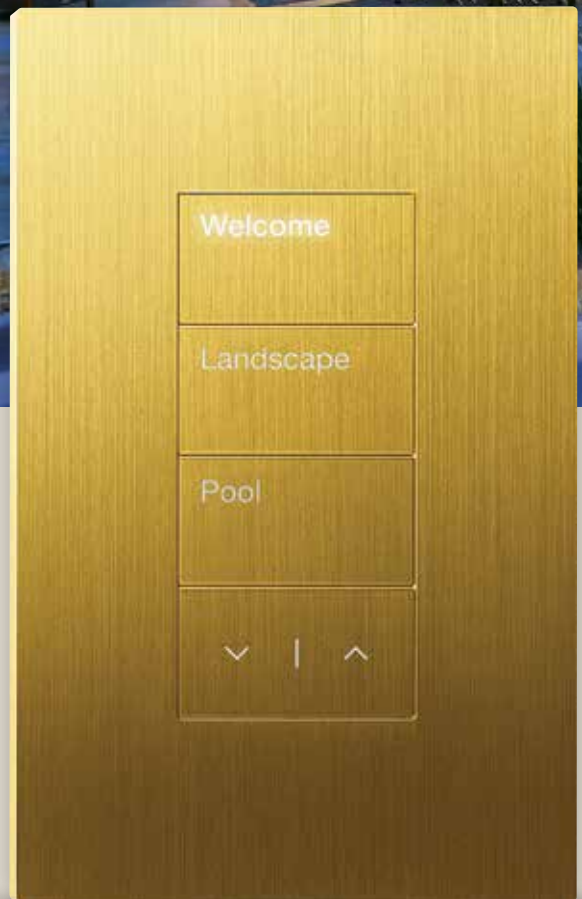

(Your Lutron system also gives you the ability to turn entryway and outdoor lights on from the security of your car—so you never have to come home to a dark home again.)

Security system keypad

Customization

Palladiom keypad in Satin Brass
(actual size)

Customization provides the ultimate in pleasance.

For advanced integration and customization, HomeWorks QS has added features.

“Thinking” buttons

HomeWorks QS keypad buttons can think for you, creating different light scenes from the same button, depending on the time of day.

For example, pressing the “Pathway” button between 10 p.m. and 5 a.m. creates a path of light to your bathroom. Pressing it after 5 a.m. creates a path of light to your kitchen.

Radio Window sensors

These sensors adjust lights and shades based on natural light levels. The sensor compensates for shadows, clouds, or bright conditions, so you’ll always have the right amount of light in a room.

Custom interfaces

You can combine HomeWorks QS keypads with other manufacturers’ controls to maintain a consistent look throughout your home.

Palladiom keypad

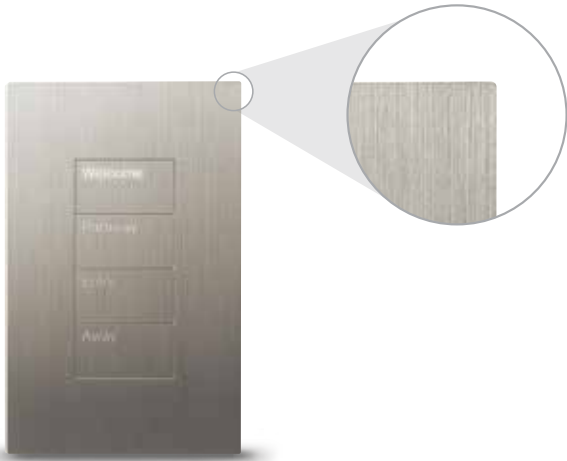

Large flush buttons with custom engraving are easy to see and use.

Buttons and wallplate are in the same material for a clean look.

Dynamic Backlighting Management: Adjust backlighting intensity based on scene or time of day. For example, at night, schedule the backlighting on a bedroom keypad to dim, but brighten on your bathroom keypad (to create a nightlight).

Control styles and colors

Pleasance is being able to complement the look and feel of any room.

New Architectural style*

- Square corners
- Flat front

Ivalo light fixtures

Pleasance also comes from high-quality LED lighting combined with refined aesthetics.

Our collection of sophisticated Ivalo lighting fixtures blends beautiful design and progressive technology with high-quality 95+ CRI LEDs and smooth, flicker-free dimming down to 1%.

The collection includes LED suspended pendants, interior and exterior sconces, recessed lighting, and linear lighting. The LEDs in these fixtures have the look and feel of incandescent/halogen light, emit little to no U/V radiation (so textiles, such as fabrics, won't fade over time), and provide consistent color from fixture to fixture.

Bringing pleasance to you

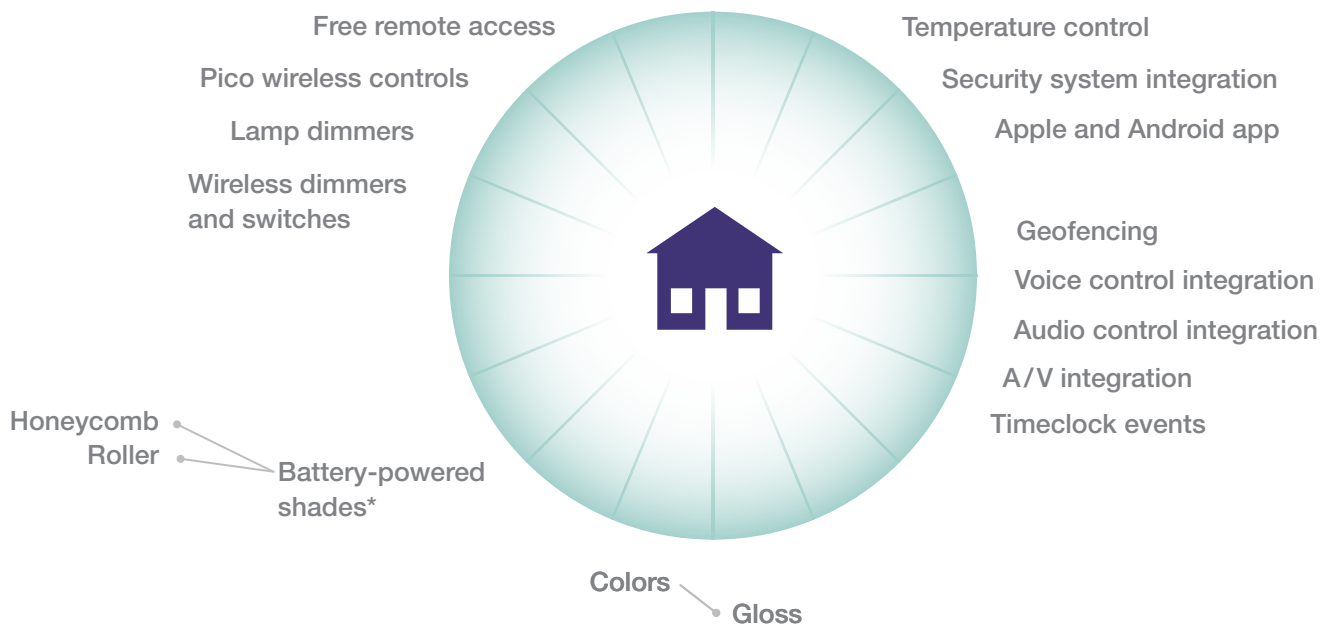

We offer three different systems that all provide pleasance, for a solution for any size home. When you add Lutron control and all the benefits it affords, you'll wonder how you ever lived without it.

Caséta Wireless

Caséta Wireless is a wireless mini-system that's ideal when you want individual control in a single room or a smaller home or condominium.

Characteristics

- Perfect for installing in existing rooms; no new wiring required
- C•L technology for controlling dimmable LEDs
- Optional Smart Bridge PRO for remote access with a smart device, as well as security and A/V integration

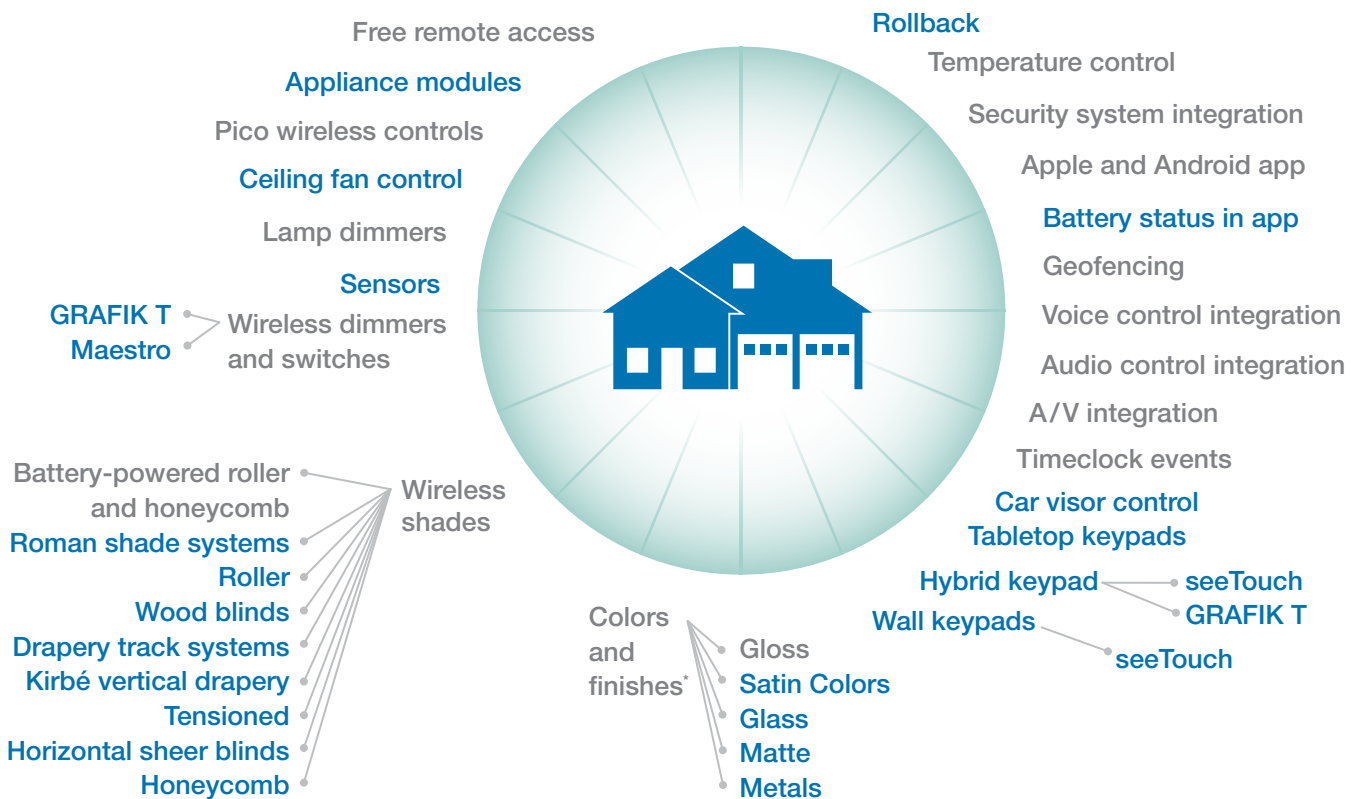

* Shades and lights are controlled independently of one another.

RadioRA 2

RadioRA 2 is a wireless system that's ideal for coordinated control in a few rooms or a whole home (up to 5,000 square feet).

Characteristics

- Utilizes backlit, custom-engraved keypads
- Controls the full line of Lutron wireless shading styles
- Controls lights, shades, and temperature simultaneously
- Integrates with security and A/V systems

* Visit lutron.com for color/finish options.

Bringing pleasance to you

HomeWorks QS

HomeWorks QS is a wireless, wired, or hybrid system for control of a whole home (up to 30,000 square feet or more).

Characteristics

- Offers the most color choices for controls
- Offers the most keypad options, including customized keypads
- Hidden panels eliminate dimmers and switches on the wall
- Offers Vacation mode for added security while you're away from home for an extended time

* Visit lutron.com for color/finish options.

Consider Lutron for all your new and existing residences

Enjoy the benefits of a wireless Lutron system in your primary home, as well as in your vacation home, on your yacht, or in a guest house on your property.
